East Midlands Signalling Renewals

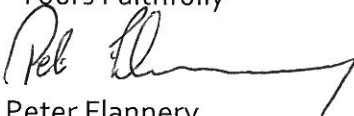

Dear Sir

I would like to thank you on behalf of Babcock Rail and all of the East Midlands Project team for the hard work and determination you and your workforce gave to us whilst on the above major project. At times we were really with our backs against the wall as part of being a civil contractor everyone else is awaiting for our installations to be complete before they can install there equipment ,You and your company joined our teams at a very important time of the project and from day one you worked alongside us both professionally and most importantly very safely.

The works you were undertaking on the project involved a wide range of activities which Included installations of PSP bases, Under Track Crossings, Vegetation clearance, Troughing to full blown installation of Major Level crossing works. The quality and delivery of the works were exceptional and the attitude of all your personnel gave a very good impression of your company not only to Babcock Rail but also to our customer Network Rail and this was noted at various meetings which I attended during the progression of the Project.

On a closing note I would have no queries in either employing or inviting you to tender for your company to be involved in any upcoming projects that Babcock Rail are involved in.

Yours Faithfully

Peter Flannery
Construction Manager
